EXPERIENCE

Red Ventures, Charlotte NC | Front End Developer

October 2016 - Present

Updated, maintained, and intergrated new features for our partners website Verizon Fios. Closely work with other VZ developers and data analysis to improve click response rate and implement features based on the Verizon guidelines.

- Contributing to documentation throughout multiple departments. (technical specification)
- Heavy focus in building ADA compliant sites for our partners.
- Working with API's to communicate with other tech platforms.
- Configured apache to host git branches as subdomains in Docker. Implemented throughout multiple teams.
- Built large scale features such as address checking and the ability to display offers/promotions based on address.
- Closely work with data analysis to improve response rate and drive conversions to our call center with split testing.
- Worked with multiple developers on the same repo. Used JIRA for project management and Git for version control.

Efelle Creative, Seattle WA | Front End Developer

July 2015 - July 2016

Responsible for working on a range of projects, designing appealing websites, and interacting on a daily basis with graphic designers, back-end developers, and marketers.

- Developing and maintaining the front end functionality of websites.
- Writing cross-browser compliant HTML5, CSS & JavaScript.
- Identifying, correcting, and fixing errors in our proprietary CMS.
- Implements third party APIs such as Google Maps, Instagram and Facebook.
- Built websites to meet W3C standards, be ADA compliance, and to be SEO friendly.
- Developed over 250,000\$ worth of websites and software applications.

Freelance, Remote | Full Stack Developer

January 2014 - February 2015

- Responsible for branding, UX/UI, graphic design, front and back end development. (ASP.NET)
- Maintained multiple domains, web hosting, and static sites.
- Created and developed website concepts, wire-frames, and content strategy plans.
- Installed IIS, configuring mySQL databases, and deployed to production servers.
